

Manufacturing Quiz

Aim- Compete with other teams in a battle of knowledge and wisdom related to manufacturing.

If you know it and dare to speak, then this is the event for you. Come be a part of this event to showcase your manufacturing knowledge. Teams of 2-3 are allowed. The participants have to go through a written quiz first which would include questions about various manufacturing processes as well as aptitude. Shortlisted teams would then compete in the buzzer round. The faster the buzzer sounds, more the questions one can answer; mind the negative marking! Teams with highest marks in the buzzer round wins irrespective of their written quiz marks.

Location- Lecture hall

Gameplay and Scoring:

Round 1: The first round will be a written round consisting of MCQs on the manufacturing processes. These questions may range from basics of manufacturing processes to advanced industrial concepts. The top few teams with highest scores will qualify for round two. (NOTE- No negative marking)

Round 2: The second round consists of verbal questioning and reasoning round. The teams can pass the question to the next team. But giving a wrong answer would attract penalty. This round will test the practical knowledge as well. And only the top five teams in this round will make it to the buzzer round i.e. round three.

Round 3: The final round is a buzzer round. This knowledge would not just test the knowledge but the first reaction also. The team pressing the buzzer first will be given a chance to answer. Wrong answer will not only attract penalties but also give an advantage to the next team as the question will automatically get passed that too without penalties. Voluntary passing is also allowed but answering such a passed question wrongly will attract penalty. The team with the greatest score will be the winner. The teams will be awarded cash prizes.

Team Size: 2-3
